

AFCESA A-GRAM

AIR FORCE CIVIL ENGINEER SUPPORT AGENCY

99-20

May 1999

WAR MOBILIZATION PLAN 1 (WMP-1)

SYNOPSIS:

The updated version of the *War Mobilization Plan* (WMP-1) has been published and is being fielded. WMP-1 is planning guidance from HQ USAF functional managers. It provides guidelines for mobilization planning and support for combat forces in war.

THE ANNEX:

The Civil Engineer Annex is Annex S. Annex S delineates doctrinal concepts, broad policies, and planning guidance for worldwide CE combat support. The annex is consistent with *Defense Planning Guidance* and the policies, planning factors, and assumptions stated in the *Joint Strategic Capabilities Plan*. It is also consistent with the doctrinal concepts of AFDD 1, *Air Force Basic Doctrine*; and AFDD 42, *Civil Engineer*. Engineers who review the updated WMP-1 will find many cross-referenced sources of information that are pertinent to comprehensive planning.

Annex S contains sections with which we all need to be familiar:

1. Situation. Includes the purpose of the annex, an overview, planning assumptions for overseas and CONUS operations, combat support priorities, and planning instructions.
2. Mission. Describes how Air Force CE forces are utilized in wartime and contingency operations.
3. General Wartime Requirements. Lists requirements all CE forces must be prepared to fulfill across a broad spectrum of conflicts and under a full range of environments.
4. Deployment of mobility forces. Discusses the Core Unit Type Code Package concept, Lead UTCs, Follow UTCs, Destination-Unique UTCs, and

Round-Out UTCs. Each CE UTC is described by number with a generalized list of UTC contents. This section also addresses sourcing guidance, command and support relationships, unit integrity, operability, and survivability.

5. Employment of forces. Discusses Civil Engineer support during contingency or wartime operations in two broad areas: combat support primarily within overseas theater(s) of operation and combat service support primarily in the CONUS.
6. Training philosophy. Addresses comprehensive and realistic individual training, leadership training, and team training.
7. Logistics and administration. Summarizes War Reserve Materiel, construction equipment sources, and resupply planning.
8. Manpower. Lists documents which provide availability of combat support forces and UTC mission capability statements. This section also tells how CE UTCs are allocated and used to fill OPLAN Time-Phased Force and Deployment Data (TPFDD) requirements.
9. Command and signal. Defines the operational control for CE personnel during contingency operations.

An appendix for explosive ordnance disposal has been added. UTC information has been updated to include newly created/modified UTCs. Collective

Protection policy has been updated in concert with current policies. Major changes have also been made to the fire protection annex.

The following are the Annex S appendices:

- 1 Wartime Construction
- 2 CONUS Base Categories
- 3 CONUS CE Contingency And Wartime Combat Service Support
- 4 Overseas Theater CE Contingency and Wartime Combat Support
- 5 Fire Protection
- 6 Environmental Protection
- 7 Air Base Operability
- 8 IMA Guidelines
- 9 Leasing and Disposal of Real Property
- 10 Nuclear, Biological, Chemical, and Conventional Warfare Defense
- 11 Explosive Ordnance Disposal

The new WMP-1 should be at the base plans office or MAJCOM Civil Engineer plans office soon. Remember, parts of this document are classified, so you will need to take the necessary security precautions to use it in its entirety. However, Annex S is unclassified. The AFCESA Contingency Support Directorate staff will reproduce and send a copy of Annex S to each A-Gram recipient. Review the newest Annex S because changes incorporated in this edition need to be addressed in local contingency plans.
